Product Details

Product: SonaSpray "fc" Black
Details: 2,000 SF at 3/4" Thick

Architect Details

Name: Chapman-Sisson Architects
Location: Huntsville, Alabama

Named for the character in Tennessee William's Pulitzer Prize winning play "A Streetcar Named Desire" Stella's Elixir Lounge in Huntsville, AL has quickly earned the reputation as one of the "hottest spots" in town. As their website highlights, the objective was to become THE place to meet after work, gather with friends, or impress a date. Recently voted the Best Cocktail Bar in Huntsville, the goal was achieved.

"We created an impeccably posh, but unpretentious lounge. It is very important that people can carry on a conversation," says Stella's owner Angela Panzica.

A three-quarter inch application of the fine textured SonaSpray "fc" in the standard color of black was chosen to eliminate the unwanted echo and reverberation.

"The ability to have the ceiling exposed while maintaining proper acoustics was an important part of the design," says Alison Corey lead architect with Chapman-Sisson Architects in Huntsville who designed the lounge.

Mission accomplished thanks to the SonaSpray "fc" application. By absorbing 80% of the unwanted noise in the restaurant, even with live music, Stella's a lively yet sophisticated lounge that many consider "sexy."

ACOUSTIC SOLUTIONS

FOR SIMILAR SONASPRAY “FC” PROJECTS

DEL FRISCO'S GRILLE

HOUSTON, TEXAS

Del Frisco's Grille is an American bar and grill that will elevate any night out with hand-crafted cocktails and a refreshing, modern menu that draws inspiration from bold flavors and fresh ingredients. Architects wanted to create an inviting and stylish atmosphere, built for creating an incredible experience that takes any lunch date, happy hour or night out to refreshing new heights. One of the challenges facing the architects with this task was controlling reverberation throughout the restaurant. SonaSpray “fc” in the custom color Urban Bronze was chosen to meet this challenge. SonaSpray “fc” outperforms all other acoustic products on the market today, and its availability in custom colors was perfect for matching the restaurant's color scheme.

Acoustic Performance

SonaSpray is applied in thicknesses from .5” up to 1” to provide the desired level of acoustical absorption. At 1”, SonaSpray provides a NRC of .85.

Light Reflectance

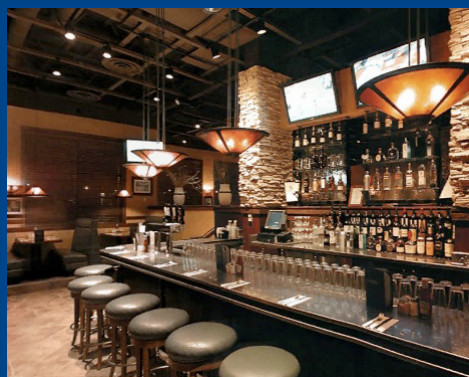

SonaSpray White, and SonaSpray Arctic White provide high light reflectivity, and can be used to maximize day lighting and reduce the need for excessive lighting.

Application

SonaSpray is spray-applied, between .5” and 1”. It is engineered for application to common substrates and can adhere to complex or irregular surfaces.

Colorful Options

SonaSpray “fc” is available in standard colors, and can be manufactured in custom, integral colors for unlimited design options.
