Location: San Antonio, TX

Product Details

Product: SonaSpray "fc"
Color: Twilight Blue

Architect Details

Name: A-3 Studio
Location: Kerrville, TX

Mamacita's has opened a new restaurant in San Antonio, Texas to take advantage of the traditional Mexican atmosphere and the many tourist attractions. Designers wanted to provide an escape for guests by taking them back to a small cozy Mexican town. An effect that was produced by creating building mock-ups for different areas of the restaurant painted with vibrant, festive colors.

Designers needed an acoustical material that effectively made the ceiling disappear. Acoustic baffles and tiles would have dramatically clashed with the visual effect designers were trying to create. SonaSpray 'fc' provides high acoustical values and did not interfere with the effect. The special Twilight Blue color effectively made the ceiling appear as a calm, clear evening. In combination, SonaSpray "fc" and the fiber-optic lighting system completed the illusion and allows patrons to enjoy a festive clear evening in a small Mexican town, even if it is raining outside.

ACOUSTIC SOLUTIONS

FOR SIMILAR SONASPRAY PROJECTS

Acoustic Performance

SonaSpray is applied in thicknesses from .5" up to 1" to provide the desired level of acoustical absorption. At 1", SonaSpray provides a NRC of .85.

Light Reflectance

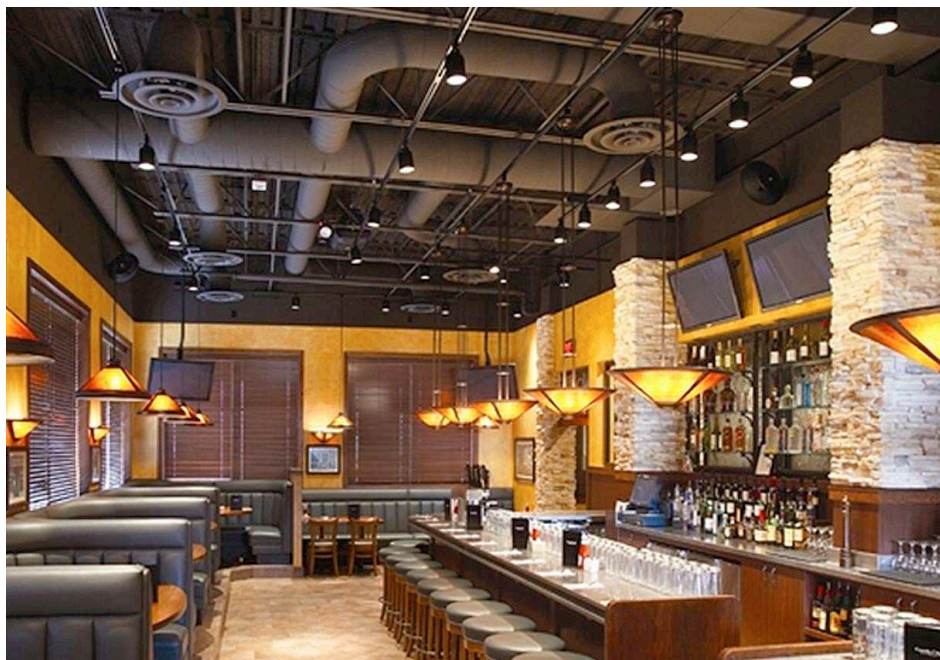

SonaSpray White, and SonaSpray Arctic White provide high light reflectivity, and can be used to maximize day lighting and reduce the need for excessive lighting.

Application

SonaSpray is spray-applied, between .5" and 1". It is engineered for application to common substrates and can adhere to complex or irregular surfaces.

Colorful Options

SonaSpray "fc" is available in standard colors, and can be manufactured in custom, integral colors for unlimited design options.

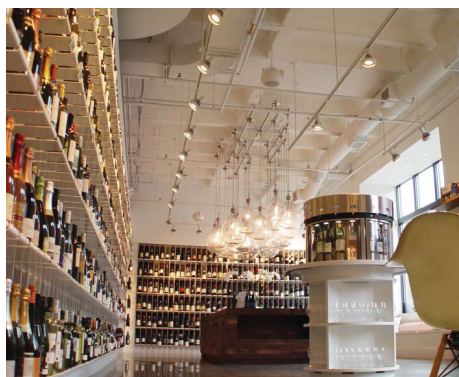

GRANITE CITY FOOD & BREWERY

Roseville, MN

Granite City Food & Brewery is a casual restaurant with an on site brewery. One of the challenges facing the architect, SJA Architects out of St. Cloud, was controlling reverberation (echo time) in the dining area. International Cellulose's SonaSpray "fc" was chosen to meet that challenge. Applied to the ceiling at 3/4" thickness, SonaSpray "fc" provides an overall Noise Reduction Coefficient of 0.75 (75%). SonaSpray "fc" was also chosen for its availability in custom colors to match the restaurant's color scheme.
