

PROJECT El Tiempo Cantina
Houston, Texas

DETAILS K-13
Tan

El Tiempo Cantina serves quality Tex Mex cuisine in Houston, Texas. They welcome each of their guests as part of the family, providing the same impeccable customer service Mama Ninfa instilled years ago. With the excessive noise a busy lunch and dinner crowd can cause, K-13 was ideal for this project to improve the dining experience. The restaurant's open floor plan and vaulted ceilings blended well with the natural finish of the K-13 Tan. Additionally, K-13 was chosen in the standard color Tan that matched the decor and theme well.

Whether for new construction or renovation, International Cellulose has an acoustical and thermal solution to help create the ideal space.

ICC also offers architects an AIA/CES HSW SD Lunch N Learn program. Contact International Cellulose Corporation today at **(800) 444-1252** or visit us online at www.spray-on.com for complete details on how ICC can improve your building projects.

ACOUSTIC SOLUTIONS

FOR RESTAURANTS, CLUBS, & BARS

WHY DO RESTAURANTS NEED THERMAL CONTROL?

There are so many things to consider when designing a restaurant, bar, or nightclub, that acoustics are sometimes overlooked. This can have disastrous results, ranging from unhappy customers to costly health and safety violations. This can easily be avoided with K-13 acoustic insulation.

The resilient fibers of K-13 absorb sound energy instead of reflecting it, reducing reverberation time and making speech and music more intelligible. K-13 reduces excessive noise while greatly improving ambient sound quality.

K-13 is spray-applied, and can adhere to virtually any common substrate, or surface configuration. K-13 is available in six standard colors, and can also be produced in custom matched, integrated colors.

WAREHOUSE BAR & GRILLE

BOSTON, MA

Warehouse Bar & Grill is a masterful fusion of an Upscale Eatery, and neighborhood Sports Bar. Edgy design details include concrete flooring, industrial lighting, open ductwork, and metal accents that give the restaurant its stylish, “warehouse” look. To prevent the restaurant from sounding like a real warehouse, K-13 Dark Gray was applied to the open truss ceiling. K-13 absorbs the unwanted sound produced by the numerous hard surfaces throughout the space, while enhancing the industrial look.
