

Project Details

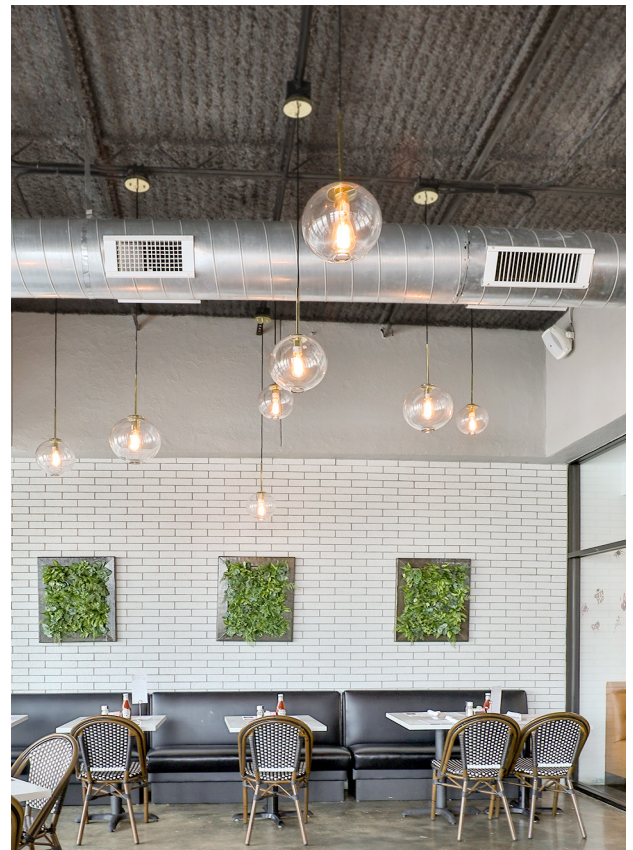

Name: Barnaby's
Location: Houston, TX

Product Details

Product: SonaSpray "fc"
Color: White & Gray

The dog-friendly Houston restaurant Barnaby's Cafe opened its ninth location on Fountain View Drive in Houston, Texas. This space used to be home to the Italian-American restaurant La Vista. One of the challenges facing the architects with this renovation was controlling reverberation throughout the restaurant. SonaSpray "fc" White and Gray were chosen to meet this challenge. SonaSpray "fc" outperforms all other acoustic products on the market today. SonaSpray "fc" White also provides high light reflectivity, which illuminates the Barnaby's dining area without the need for excessive light fixtures.

No matter your project's requirements and budget constraints, ICC's products can be customized to meet your needs. Restaurants, warehouses, worship facilities, gymnasiums, and schools are just a few of the many types of projects that benefit from SonaSpray "fc".

MAMACITA'S

San Antonio, TX

Mamacita's opened a new restaurant in San Antonio, Texas to take advantage of the traditional Mexican atmosphere and the many tourist attractions. Designers wanted to provide an escape for guests by taking them back to a small cozy Mexican town. An effect that was produced by creating building mock-ups for different areas of the restaurant painted with vibrant, festive colors. The special Twilight Blue color effectively made the ceiling appear as a calm, clear evening. In combination, SonaSpray "fc" and the fiber-optic lighting system completed the illusion and allows patrons to enjoy a festive clear evening in a small Mexican town, even if it is raining outside.

Acoustic Performance

SonaSpray is applied in thicknesses from .5" up to 1" to provide the desired level of acoustical absorption. At 1", SonaSpray provides a NRC of .85.

Light Reflectance

SonaSpray White, and SonaSpray Arctic White provide high light reflectivity, and can be used to maximize day lighting and reduce the need for excessive lighting.

Application

SonaSpray is spray-applied, between .5" and 1". It is engineered for application to common substrates and can adhere to complex or irregular surfaces.

Colorful Options

SonaSpray "fc" is available in standard colors, and can be manufactured in custom, integral colors for unlimited design options.
