

Project Details

Name: The Yellow Cup
Location: Houston, Texas

Product Details

Product: K-13 White
Details: 750 SF at 1" Thick

The Yellow Cup is a premier coffee shop serving craft coffee and espresso, premium teas, and pastries in a cozy environment. Located at the floor level of Elan Memorial Park Luxury Apartments in Houston's thriving Memorial neighborhood, The Yellow Cup is a local staple in the community.

Due to its location beneath occupied residences, acoustics played a particularly important role in the design. To address the need for acoustical control within the space, without compromising the ceiling height or the design, K-13 in White was utilized as an exposed interior ceiling finish. Unlike the other hard, reflective surfaces used throughout the space, the application of K-13 absorbs echo, reverberation, and excessive noise, which would otherwise be prevalent. In addition to absorbing sound within the space, the application of K-13 also helps to reduce sound transmitting to the occupied spaces above. In addition to acoustic performance, K-13 in White provides high light reflectance and optimizes natural daylighting.

ACOUSTIC & THERMAL SOLUTIONS

FOR SIMILAR K-13 PROJECTS

GATHER

BOSTON, MASSACHUSETTS

Gather is a full-service, restaurant and bar located within District Hall in the rapidly expanding Innovation District. Gather offers an inventive, New American menu made from fresh, local ingredients, in a distinct environment that serves as a refuge from the fast-paced hustle of the surrounding area. Gather was designed by Hacin + Associates who also designed District Hall. To meet this challenge, a 1.5" application of K-13 Black was applied to the open truss ceiling. K-13 absorbs unwanted echo and reverberation while enhancing ambient sound.

Acoustic Performance

K-13 is applied in thicknesses from 1" up to 5" to provide the desired level of acoustical absorption. At 1", K-13 provides a NRC of .80.

Thermal Value

K-13 has a R-Value of 3.75 per inch. This demonstrates how K-13 helps keep a space at the right temperature, saving on costs and the environment.

Application

K-13 is spray-applied, between 1" and 5". It is engineered for application to common substrates and can adhere to complex or irregular surfaces.

Colorful Options

K-13 is available in standard colors, and can be manufactured in custom, integral colors for unlimited design options.
