

SonaSpray “fc”[®]

Acoustical finish

DESIGN SOLUTION

DYNAMIC OPEN-PLAN OFFICE

Project Details

Name: Samsung Plano Office Complex

Location: Plano, Texas

Product Details

Product: SonaSpray “fc” Custom Color
Black Swan SW 6279

Details: 33,000 SF at 0.5” Thick

Architect Details

Name: Gensler

Location: Dallas, Texas

Samsung’s new, state-of-the-art space in North Dallas is a modern office environment. The contemporary campus is filled with lavish amenities including a food hall, fitness center, lap pool, walking trails, and even outdoor meeting and event spaces. Designed by Gensler, the sophisticated space is filled with innovative, high-tech, products developed by Samsung, that allow for employees to move freely throughout the space, untethered to their desks as they would be in a traditional office setting. In place of individual offices, the open-concept design features numerous collaborative spaces and various-sized meeting rooms that can accommodate different-sized groups.

To ensure occupant comfort and proper functioning of the mixed-use building, acoustics played an essential role in the design. To address the need for acoustics in the open-concept environments without compromising the interior design objectives, SonaSpray “fc” in custom color “Black Swan” was utilized throughout the space. SonaSpray “fc” was spray-applied to the exposed beams and open ceilings. Unlike hard surfaces and other materials used throughout the building which reflect sound, the application of SonaSpray “fc” absorbs echo, reverberation, and excessive noise. In addition to acoustic performance, the application of SonaSpray “fc” custom color complements the distinctive design details. SonaSpray “fc” is GREENGUARD Gold certified for offices and classrooms and contributes towards the creation of healthier indoor environments.

ACOUSTIC SOLUTIONS

FOR SIMILAR SONASPRAY “FC” PROJECTS

Acoustic Performance

SonaSpray is applied in thicknesses from .5” up to 1” to provide the desired level of acoustical absorption. At 1”, SonaSpray provides a NRC of .85.

Light Reflectance

SonaSpray White, and SonaSpray Arctic White provide high light reflectivity, and can be used to maximize day lighting and reduce the need for excessive lighting.

Application

SonaSpray is spray-applied, between .5” and 1”. It is engineered for application to common substrates and can adhere to complex or irregular surfaces.

Colorful Options

SonaSpray “fc” is available in standard colors, and can be manufactured in custom, integral colors for unlimited design options.

CONVERSE INC. WORLD H.Q. BOSTON, MASSACHUSETTS

Converse Inc. World Headquarters, built in Boston at Lovejoy Wharf, is a gorgeous example of what can be achieved with adaptive reuse in design. Acoustical absorption is imperative to effectively convert an existing industrial building into a functional open-plan office. Without adequate acoustical finishes, hard surfaces and materials reflect sound and produce echo, reverberation, and excessive noise, decreasing functionality and occupant comfort. SonaSpray “fc” acoustical finish was chosen for Converse Inc. to address these issues. SonaSpray “fc” absorbs excessive noise making speech more intelligible, while enhancing overall sound quality.
